

**Amendments to the Claims**

This listing of claims replaces all prior versions, and listings, of claims in the above-identified application:

**Listing of Claims**

**1-25. Canceled**

26. **(Original)** A composition for use in integrated circuit fabrication, the composition consisting of:

greater than about 1.0 wt-% of at least one fluoride ion source comprising an organic cation; and

at least one organic solvent.

27. **(Original)** A composition for use in integrated circuit fabrication, the composition comprising:

at least one fluoride ion source comprising an organic cation; and

at least one organic solvent,

wherein the composition includes no more than about 3 wt-% water.

28. **(Original)** The composition of claim 27 wherein the fluoride ion source includes F<sup>-</sup> ions or HF<sub>2</sub><sup>-</sup> ions.

29. **(Original)** The composition of claim 27 wherein the fluoride ion source includes a cation selected from the group consisting of an organoammonium cation, a pyridinium cation, a quaternary organophosphonium cation, a quaternary organoarsonium cation, a quaternary organostibonium cation, a triorganocarbonium cation, and an organosulfonium cation.

Applicant(s): Yates et al.

Serial No. Unknown (Parent Serial No. 09/595,714)

Filed: Herewith (Parent: June 16, 2000)

For: COMPOSITIONS AND METHODS FOR REMOVING ETCH RESIDUE

---

30. **(Original)** The composition of claim 27 wherein the fluoride ion source includes a quaternary ammonium fluoride.

31. **(Original)** The composition of claim 27 wherein the composition is in contact with a substrate having an etch residue on at least one surface.

32. **(Original)** The composition of claim 31 wherein the etch residue comprises polymeric etch residue.

33. **(Original)** The composition of claim 31 wherein the composition is effective to remove at least a portion of the etch residue.

34. **(Original)** The composition of claim 27 wherein the composition is in contact with a semiconductor structure having an etch residue on at least one surface.

35. **(Original)** The composition of claim 34 wherein the composition is effective to remove at least a portion of the etch residue.

36. **(Original)** The composition of claim 27 wherein the composition is in contact with a semiconductor structure having an etch residue on at least a portion thereof and comprising a layer comprising at least a portion of exposed metal.

37. **(Original)** The composition of claim 36 wherein the composition is effective to remove at least a portion of the etch residue and substantially none of the exposed metal.

38. **(Original)** A composition for use in integrated circuit fabrication, the composition comprising:

at least one fluoride ion source comprising an organic cation; and

at least one organic solvent,

wherein the composition is free of water.

39. **(Original)** The composition of claim 38 wherein the fluoride ion source includes F<sup>-</sup> ions or HF<sub>2</sub><sup>-</sup> ions.

40. **(Original)** The composition of claim 38 wherein the fluoride ion source includes a cation selected from the group consisting of an organoammonium cation, a pyridinium cation, a quaternary organophosphonium cation, a quaternary organoarsonium cation, a quaternary organostibonium cation, a triorganocarbonium cation, and an organosulfonium cation.

41. **(Original)** The composition of claim 38 wherein the fluoride ion source includes a quaternary ammonium fluoride.

42. **(Original)** A composition for use in integrated circuit fabrication, the composition consisting essentially of:

at least one fluoride ion source comprising an organic cation; and

at least one organic solvent.

43. **(Original)** The composition of claim 42 wherein the fluoride ion source is present in the composition in an amount of no greater than about 1.0 wt-%.

44. **(Original)** The composition of claim 42 wherein the fluoride ion source is present in the composition in an amount of no greater than about 0.5 wt-%.

45. **(Original)** The composition of claim 42 wherein the fluoride ion source is present in the composition in an amount of no greater than about 0.1 wt-%.

---

46. **(Original)** The composition of claim 42 wherein the fluoride ion source is present in the composition in an amount of no greater than about 0.01 wt-%.

47. **(Original)** A composition for use in integrated circuit fabrication, the composition consisting of:

at least one fluoride ion source comprising an organic cation; and

at least one organic solvent.

48. **(Original)** The composition of claim 47 wherein the fluoride ion source includes F<sup>-</sup> ions or HF<sub>2</sub><sup>-</sup> ions.

49. **(Original)** The composition of claim 47 wherein the fluoride ion source includes a cation selected from the group consisting of an organoammonium cation, a pyridinium cation, a quaternary organophosphonium cation, a quaternary organoarsonium cation, a quaternary organostibonium cation, a triorganocarbonium cation, and an organosulfonium cation.

50. **(Original)** The composition of claim 47 wherein the fluoride ion source includes a quaternary ammonium fluoride.
